

How to convert colab notebook to PDF file

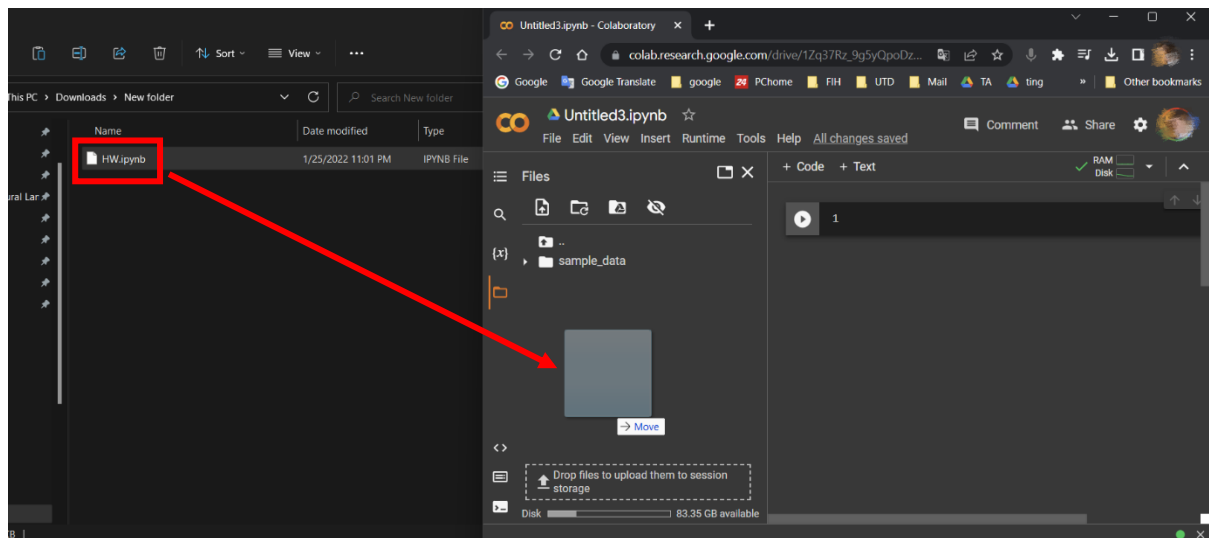

1. Open a new colab file

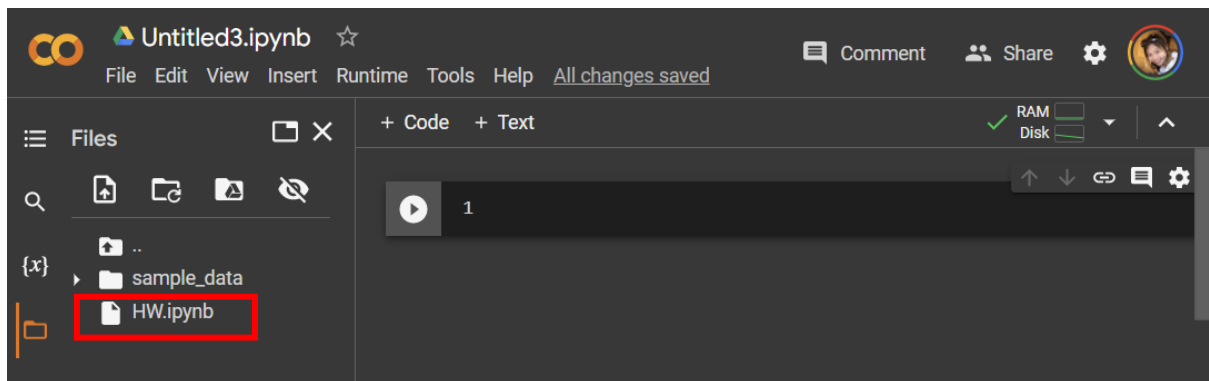

2. Click on "Files"

3. Drag and drop the ipynb file you would like to convert to the file folder

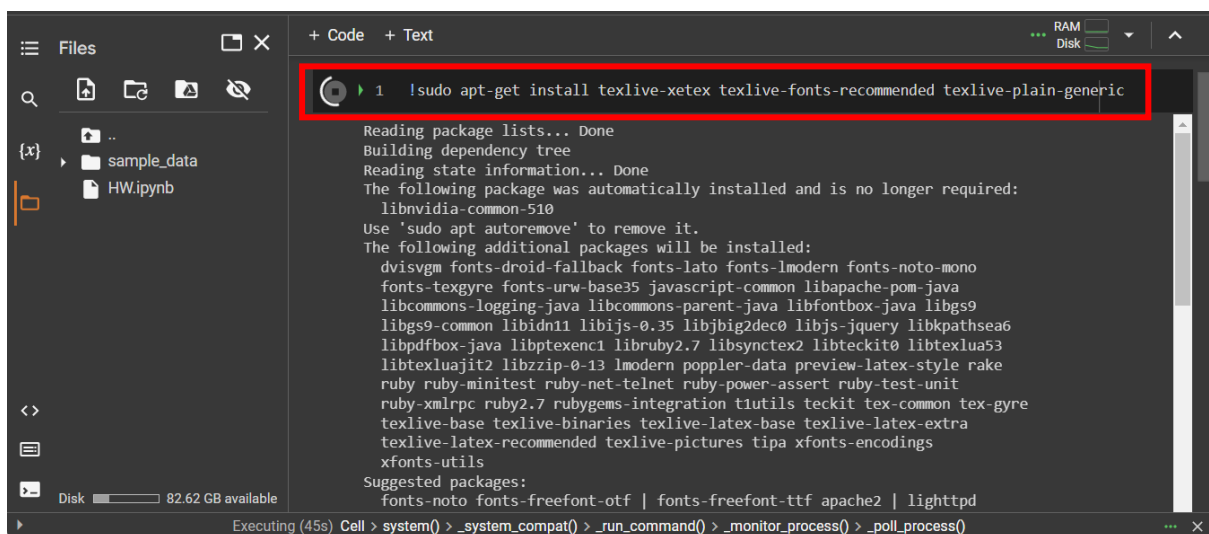

You will see the ipynb file appear in the file folder

4. Run following command

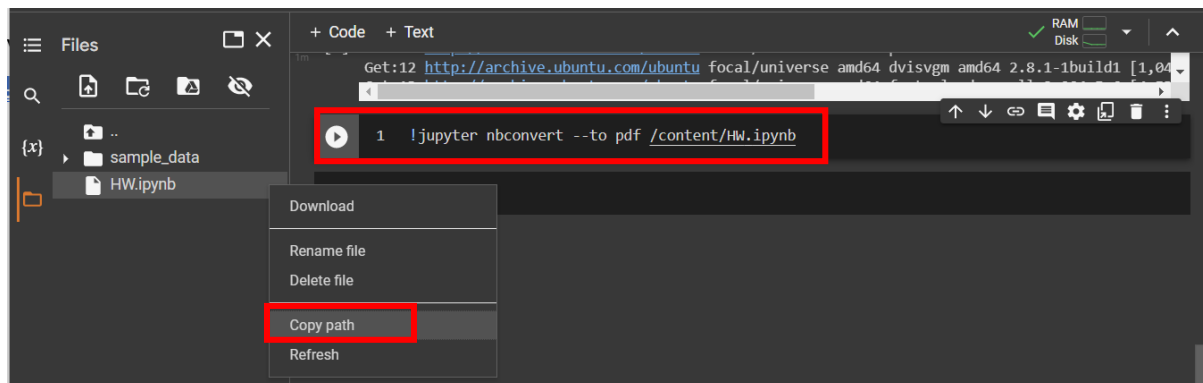

`!sudo apt-get install texlive-xetex texlive-fonts-recommended texlive-plain-generic`

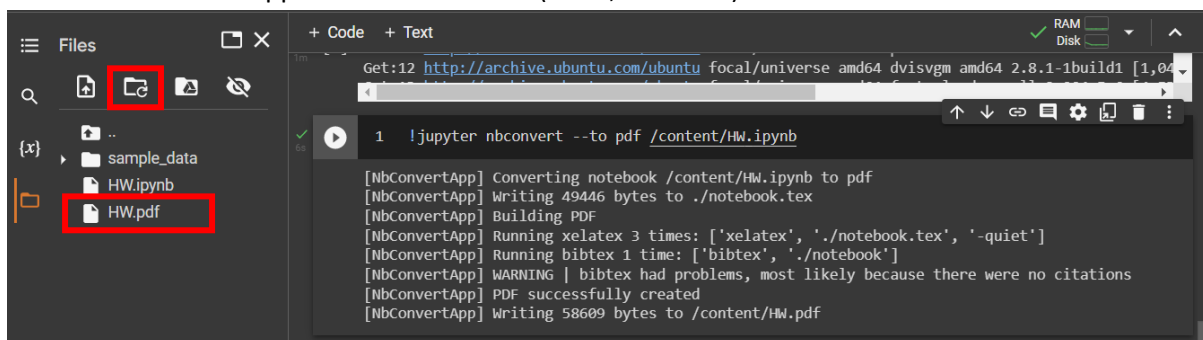

5. Right click on the file to copy the file path, put it in the following command and execute it

!jupyter nbconvert --to pdf <file path>

Ex **!jupyter nbconvert --to pdf /content/HW.ipynb**

6. The PDF file will appear in the file folder (if not, refresh it) after execution

7. Right click on the file to download
